CONSENT

Before we begin, let me tell you that this interview is completely voluntary. You may end your participation at any time. Information collected for this study will be kept confidential to the extent allowed by local, state and federal law, and no reference will be made in any oral or written report that would link you individually to the study.

Should we come to any question that makes you feel too uncomfortable or you do not want to answer, just let me know and we can go on to the next question. There is no direct benefits, such as monetary incentive or a gift, to you personally for participating in this research. For quality control purposes, this interview may be monitored by my supervisor.

READ AS NECESSARY: If you have any questions about this research, please contact the project manager, Jill Hardy at the Office for Survey Research at Michigan State University at 517.353.1765 or by email at jill.hardy@ssc.msu.edu.

Influence on economic development

Now I want to ask you about who you think has influence on [fill cityfill]'s local government.

Some people think business interests have a lot of influence over the decisions local government officials make about policies in [city]. Other people think citizens and citizens' groups have a lot of influence over local policy decisions.

I'm going to list different kinds of local policies. Thinking about the decisions of local government officials in [city], please tell me if you think business interests or citizens and citizen's interests have more influence or if you think their influence is about equal.

Would you say business interests or citizens and citizens' groups have more influence over [city] government officials when they make decisions about local economic development policy in [city]? Or would you say their influence is about equal?

Overall balance business vs citizen influence

[if RANDOM eq <2>]
Some people think business interests have a lot of influence over the decisions local government officials make about policies in [city]. Other people think citizens and citizens' groups have a lot of influence over local policy decisions.
[endif]

Overall, how would you describe the balance between the influence of business interests and citizen and citizen's groups interests over [city] government officials when they make policy decisions?

Would you say business interests are more powerful, business and citizen interests have about the same influence, or would you citizen and citizen's groups interests are more powerful?

Government officials don't always agree on things and that may affect local public decision making. I am going to read a list of statements about public decision making and would like you to tell me how strongly you agree or disagree with each.

Public decisions should be made by consensus, meaning all the decision makers agree, rather than just the majority.

Would you say you strongly agree, agree, disagree or strongly disagree?

PTolerance1        Free Speech tolerance

People may have differing ideas of how much citizens should be allowed to express their personal views in society. I'm going to read you a few statements, like earlier, please tell me how strongly you agree or disagree with each.

Free speech is just not worth it if it means that we have to put up with the danger to society of extremist political views.

Would you say you strongly agree, agree, disagree or strongly disagree?

Next, I want you to think of a specific group of people or organization that you really dislike.

So you know what kinds of groups I want you to think of, here are some examples people have given in the past: U.S. Communist Party, religious fundamentalists, The Klu Klux Klan, The NAACP, people who are against all churches and religion, gay rights activists.

You don't have to use one of these groups, the important thing is that you dislike the group you pick.

I'm going to ask you some questions about what you think members of that group should be allowed to do. You don't have to give me the name of the group, but having the name will help make the questions easier to understand.
